

how to use slingers

Slingers come in a range of designs, sizes and lengths....here's a guide to what you can expect

The strings are wrapped around the slinger and step one is to unwrap the strings - being careful not to create knots

Here the strings have been unwrapped and both ends have a loop

One loop is fixed to the slinger and the other loop is at the end of the string

Thumb tacks are often the best way to secure slingers to walls, architraves etc
Secure the fixed end first

This shows how the fixed end is secured and how the slinger will then start to stretch out

Gently pull the slinger out using the strings
The slinger will continue to stretch out

Secure the other end of the slinger loop with a thumb tack to a wall, architrave or similar
